In the **first** class we will be measuring each other, reviewing how to add or change your measurements in the software. Be sure to wear clothing that will facilitate taking accurate tape measurements and bring your laptop computer with My Label software loaded.

Please come to the **second** class with your muslin cut from your pattern. We will sew the vest together in class and address the areas of fit as we go along with construction. Please do not adjust any of your measurements for the vest prior to class. You will also learn to work with linings.
